This transformed the entire school chores channel through the Information Technology, bringing in more transparency and enhanced communication with parents and community launching the SCHOOL APP and school's own WEB PORTAL.

Having the school completely digitized brings innumerable advantages to the parents, teachers and the school itself.

Parents can keep a real-time track of the status of their child for Daily Attendance, Fee status, Periodic Results, School Circulars and News, etc. through the SCHOOL APP on Android and Apple mobiles and through the WEB PORTAL.

Parents have a direct access to communicate with the Class-Teacher for regular update of their child and in case some matter needs my personal attention can be escalated directly to me through Portal.

Our efforts are on and each day the new accomplishments pour in. As a new endeavor, keeping in pace with the technology we have replaced manually prepared Report-cards with computer generated Report-Cards.

(Dr. Mamta)

In today's world, learning English is a vital skill that will help the students to achieve their full potential throughout their life. We facilitate the students with the right methods to learn English quickly, effectively and enjoyably with Cambridge YLE - Young Learners program for classes III- VIII namely Starters ,Movers, Flyers, KET, PET and FCE.

(Ms. Leena) Sanskrit, a language of the cosmic world that has universal importance, has been added as a part of the curriculum. This is again an effort towards globalization. Undoubtedly, English opens global windows, but Sanskrit is the one that has been accepted by the cosmos. It's also an effort to keep our roots intact. If we have language labs for grooming their English language and spoken skills, we have audio-visual classrooms for improving their habit of listening, which nowadays they think isn't that important. They love the world of technology and gadgets, so we provided them with that too, in order to make the teaching and learning process interesting and happy. Well begun is half done, so we begin our day with activities of their interest like yoga, Zumba, dance, theater, orchestra, and games. Ours is an effort to not forget our mother earth, so we added gardening to it too. Music and games are an inseparable part of children's learning so apart from academics, we have a performing arts department with trained faculties. Music adds a rhythm to our lives, as do the instruments. Tabla and classical dance gave it a new direction and height. You will be pleased to know we are planning to open our music academy ' SANGEET KALA KENDRA ' to make it the best in all directions.

Our lush green campus with beautiful murals and paintings is huge inspiration for its students, with which they become excellent painters and admirers of the nature. The very first step in this direction was our art workshop with rustic walls and a pottery-making workshop in it. They put their

hands on pottery, which unintentionally joins them to their alma mater. They experience the forgotten essence and fragrance of clay, and they get connected to their own origins that they have forgotten in this concrete world.

Following green energy initiative of the government the school has started plying an E- Bus with a hope to reduce carbon Footprints.

Towards the end, I thank the supportive management whose continuous support to our ideology of education has enabled the school to come this far. Teachers and the entire staff members also deserve applause for their tireless efforts in implementing the route map of imparting quality education here. I also extend my heartfelt thanks to the parents of our students who have shown unflinching faith in us by giving us the profound opportunity to transform their children into truly useful citizens of the future world. Our effort to strike a balance between ground and sky will surely take us to new horizons and the epitome of success.

Thank you
